ABOUT

I am a Software Engineer with proven experience in e-commerce projects with tens of thousands of daily visitors, defense industry projects, and public and private sector projects. I have been using Angular on the front end for about four years. On the back end, I have approximately one year of experience with .NET Core.

WORK EXPERIENCE

MIA TEKNOLOJİ

• MIA-MED Hospital Management System Software

- Contributed to the development of the web version of a hospital management system actively used in 9 cities in Turkey.
- Gained experience in **standalone component** architecture and **Signal-based programming** with **Angular 17**.
- Developed customized components with **PrimeNG** and designed dynamic, nested forms.
- Contributed to the infrastructure of a large-scale system with **1000+ screens**, following the **Angular Coding Style Guide**.
- Designed a **scalable** architecture with **multi-theme** support.

NTT DATA BUSINESS SOLUTIONS TURKEY

• SpeedyBunny.com - Kuwait

- Developed a food ordering project actively used in Kuwait using the Angular-based **Spartacus framework** as part of **SAP** consultancy.
- Optimized location-based services with **Google Maps API**.
- Gained experience in multilingual application development by implementing **Arabic language support** and an **RTL-compatible** interface.

• GRATIS.COM

- Developed with the Spartacus framework in this SAP-based e-commerce project.
- Worked on SEO improvements using **Server-Side Rendering (SSR)** and integrated **GTM** and **CDN**.
- Enhanced my **reactive programming** skills by managing complex data streams with **RxJS**.

ARKSOFT

• EASY2PATCH

- Worked as a Front-End Developer on a project managing the latest versions of third-party applications used in both the public and private sectors.
- Optimized the file upload process by implementing **chunked uploads** to the API and improving the merging process on the front end.

• ARKLICENSE

- Contributed as a **Full Stack Developer** to a customer and license management project, designing advanced tables and user interfaces with Angular & PrimeNG.
- Played an active role in critical processes like API design, data calculations, Azure AD integration, and Excel exports using **MSSQL**, **.NET Core**, and **Entity Framework**.

WORK EXPERIENCE

- **Session Audit**

- Worked as a Front-End Developer on a project enabling secure session management and advanced reporting for shared machines at **ASELSAN** with Active Directory integration.
- Implemented **real-time data communication** using **SignalR** in Angular to display the live status of machines.

- **Exchange Device Management**

- Worked as a Front-End Developer on the Exchange device management project.
- Developed a **boilerplate library** for use in various projects.

AKILLI SINAV

- **Akıllı Sınav Education Module**

- In this project, I used Angular and TypeScript to develop user-friendly interfaces, while utilizing Bootstrap for responsive design.
